Do you want an easy way to support young people? Have you heard of digital badges?

What is a Digital Badge?

Digital Badges are a simple way to acknowledge the value of creative skills and experiences, support young people on creative pathways, and evaluate and demonstrate the impact your organisation is making.

- A smart, simple, and visual way of recognising non-accredited learning
- A valuable tool for young people to proudly display on their website, email signature, LinkedIn profile, and CV
- An effective and inexpensive method to prove your organisation's impact
- A shareable website link, accessible to anyone globally

Did you know?

If you're a Coastal Catalyst partner, you receive:

- Free access to the digital badging platform
- Support with issuing digital badges
- Guidance on embedding badges into your programmes
- Data on how young people are engaging with your badge offer
- Increased visibility — as young people share their badges, they also raise the profile of your organisation

At Coastal Catalyst, we focus on experiences that build creative skills — helping young people to imagine, generate, and innovate their own ideas.

We've worked with organisations to offer badges for activities such as podcast workshops, video game events and work experience at creative companies.
